Midwives from Plum are all preceptors for the midwifery program at UBC and are pleased to include a midwifery student as part of our team. Having a student involved with your care is an option we hope you will choose as part of your care. Our new student will be arriving in September 2010.

Students coming from UBC are mostly 3rd year or in their 4th year (last year) and come to our clinic offering enthusiasm, latest research information on many topics, an opportunity for continuity as their presence often will be at most prenatal visits, labour and birth and postpartum visits. We see this as an opportunity for clients, ourselves and of course the students. We hope you will welcome a student into your care to help provide this opportunity for the growth of midwifery in our province.

Please let us know at any time if this choice is not for you. We also welcome your feedback.

Sincerely,

Plum midwives
